COMPUTER SCIENCE
Session (2018-19)

The Computer Science Department started in 2009. Computer Science as an elective subject is taught in B.A. and B.Sc. There is also an add-on course in Information Technology (IT) in our college.

We have computer science society which focuses on imparting the knowledge of computer to our students and help them nourish their personalities using different type of activities i.e. by engaging them in seminar, presentations, workshops and group discussions etc. We have worked on arranging various workshops frequently for the students to keep them up to date in this advanced era of technology.

We focus on theoretical and practical knowledge of student by giving them assignments time to time, providing them exposure to labs and conducting examinations at college level prior to University exams. Well-structured, properly maintained and advanced equipped labs are set up along with working internet facility for students. Students of computer science of the college have proven their ability by showing academic excellence since long time. During the last session most of the students of the computer science department have scored more than 75% marks in final examination. The department also plays significant role for other departments like department of art, department of science and department of commerce by extending supportive hand towards various tasks organizations for them like arranging seminars and other ICT facilities required for conducting their activities done by department during session 2018-19.

1. An inter college Power Point Presentation was held to facilitate students to come up with their capability to present the topic of social as well as communication and verbal skills. The department proactively conducts such presentations at class level on regular basis in order to help the students achieve desired skills.
2. A workshop on digital literacy awareness programme was conducted on 30th Jan 2019 by department of Computer Science which run under initiative of Govt. of India for duration of 10 days training programme. Total of 591 students well trained along with teaching and non-teaching staff of college. On successful completion, certificate on behalf of Govt. of India was awarded to all the participants.
3. Department of Computer Science encourages students for various levels of competitions. Zerone 2 K 19 inter college competition was held at "Arya PG College, Panipat" on 9th March 2019. The college students actively participate as well as won the third prize.
4. Department of Computer Science is a team of well qualified professionals who keep their knowledge up to date by attending various seminars and conferences. The department also shares the responsibility of knowledge sharing by conducting regular workshop and seminar for college staff (teaching and non-teaching) and for students on regular basis.

5. Some students of college participated in the CRS University for "Youth Parliament Programme". The team of computer staff motivated them to get registered for this event and volunteered to upload their videos on HKMV YouTube channel.

The department is committed to provide quality education and better learning opportunity and spread awareness among students towards their surrounding so that the students can have overall development of their personalities.
